

## Safe medical packaging

## The offer for sterilisation

The finest quality of sterilisation and after-sterilisation packaging, manufactured by TZMO, is the outcome of our knowledge and skills gained from experience, well-qualified and motivated workers, modern factories. We are aware how important task those products are to fulfil.

In order to secure the safety and quality of our packaging, the production environment undergoes strict and constant control during the manufacturing process. That's how we eliminate the presence of transmitted microorganisms such as fungi, viruses and bacteria.

In order to secure the safety and quality of our packaging the production environment during the manufacturing process undergoes strict and constant control. That's how we eliminate the presence of transmitted microorganisms such as fungi, viruses and bacteria.

The utility parameters of BOM products are confirmed by our experienced laboratory workers, who carefully test every manufactured group of products as for the strength, resistance to damages and high temperature, sealing and opening quality. All BOM products are manufactured according to harmonised and validated production processes and according to the directives of the European Union.

We have certificates confirming that we comply with the following standards:

**EN ISO 9001**

**EN ISO 13485**

Moreover, we meet the Good Manufacturing Practice (GMP) requirements recommended by the WHO. In this way the BOM packaging can be safely used in hospitals and treatment rooms. They easily find their application in industry.

## Our main advantages: **HYGIENIC STANDARDS**

according to the directives of the European Union

### **RELIABILITY**

production safety

### **IN-HOUSE MANUFACTURING**

quickly and competitively

### **RESPONSIBILITY**

competence and customer oriented attitude

### **ELASTICITY**

company combining rich tradition and state-of-the-art technology

As an experienced company acting on many international markets we have possibilities to implement innovative solutions for sterilisation packaging, which are precisely adjusted to the needs of our customers and the market. Our packaging offer is made of different raw materials: film, paper and nonwoven.

The wide offer of our products enables us to satisfy every customer's needs!

### The offer covers:

- ▶ Paper-film pouches with or without gusset  
sterilisation: STEAM, EO, FORM
- ▶ Paper-film pouches  
sterilisation: IRRAD, EO
- ▶ Adhesive paper-film pouches  
sterilisation: STEAM, EO
- ▶ Nonwoven-film pouches  
sterilisation: STEAM, EO, FORM
- ▶ Paper-film reels with or without gusset  
sterilisation: STEAM, EO, FORM
- ▶ Paper-film reels  
sterilisation: IRRAD, EO
- ▶ Tyvek®-film reels  
sterilisation: VH202 (PLASMA)
- ▶ Nonwoven-film reels  
sterilisation: STEAM, EO, FORM
- ▶ Gussetted paper bags  
sterilisation: STEAM
- ▶ Crepe paper in sheets  
sterilisation: STEAM, EO, FORM, IRRAD
- ▶ Nonwoven in sheets  
sterilisation: STEAM, EO, IRRAD
- ▶ Adhesive tapes
- ▶ Adhesive film bags  
to be used after sterilisation

### What's more

Modern factories combined with our knowledge and competence in the production of medical packaging enable us to prepare an individual offer any time. We develop and produce packaging for wide variety of applications.

**Together we can find an optimal solution!**
